“All Aboard” - Two California Rail systems choose OPRA to maintain Stations and Tracks

Marina del Rey, CA - Transit America who now is responsible for Station and Track maintenance for the largest commuter rail systems in California have OPRA on board to manage the workflow, preventative maintenance and other aspects of these large operations. CalTrain which runs in the San Francisco area and the San Diego rail system are both managed by the Transit America who selected the OPRA system to insure that things run smoothly.

OPRA is a Cloud based system that uses familiar Internet buttons, navigation conventions and forms which make training less of an issue than with traditional stand alone systems. Clients may utilize OPRA’s server sites which feature carrier redundancy, system redundancy and ultra-high security.

PPS Systems, Inc. is a privately held company with headquarters in Marina del Rey, California. The service that is described above relates to a natural expansion of the utilization of the company’s expertise and services available. Interested parties may contact PPS at 800-545-4888 or email at sales@opras.net.
